

School registration form project application

What sort of projects can FundStar raise money for?

A school minibus. An astroturf pitch. Musical instruments. Playground equipment – it's up to you! And you can have several different projects running at the same time.

Schools have had greatest fundraising success when their FundStar projects are capital projects – tangible items that have a direct benefit for students. We would advise you that the following projects aren't suitable for FundStar (and will not be approved by your account manager):

1. Activities which ought to be funded by the government
2. Overheads and maintenance costs
3. Non-specific appeals
4. Costs of school trips, expeditions etc
5. The purchase of land or existing buildings (including a building's freehold)
6. Repayment of loans
7. Projects that have already been completed

Your account manager will happily give advice about suitable FundStar project/s.

Setting up your project

Please be very careful when you set up your project because once it has been set up, it can't be changed. When you set up your project, we will ask you to provide:

- Project title
- Project description
- Project start date and end date
- Project cost
- Image
- Optional thank you note (an automated short message which will be displayed after your donors have supported the project)

Fundraising target

You may choose to raise some of the project costs offline through, for example, a concert or a cake sale. Please only tell us how much you intend to raise through FundStar. (Of course, you may decide to raise 100% of the project costs through FundStar, and not engage in any fundraising events at all.)

Once you have set up your project, it will take 48h for your account manager to approve and activate your project. Please do not contact your supporters to promote FundStar or your project until the 48 hours have elapsed.

Payment schedule

Once you have raised 100% of your project costs (excluding any Gift Aid), we will transfer the money to your bank account by the end of the term in which you hit your target.

What happens if we don't raise our FundStar target?

1. You can extend your project end date. Please feel free to ask your account manager for help in re-engaging your parents.
2. If at the end of the extended end date, you still haven't raised the money, please talk to your account manager for advice.
